JOHN WALKER, one of the Patentees of Corrugated Iron, calls the attention of Architects, Engineers, &c., to his List of Prices, which, consistently with good workmanship, are extremely low.

MOREWOOD and ROGERS'S PATENT GALVANIZED TINNED IRON.—i.e. Iron Tinned previously to being Galvanized. The attention of Architects, Engineers, and others is directed to the various uses to which this metal can be beneficially applied, viz., for all roofing purposes, especially of large span, either plain corrugated, arched and corrugated, or in the form of tiles; for all sheds, barns, and buildings of a similar description; for the lining of tunnels, cisterns, and tanks; for gutters, ridges, and piping of every description, plain and ornamental, nails, bolts, and rivets, iron hooping; and for nautical purposes, sheathing, anchors, chains, &c.

ANDREW WHYTOCK, 62, New Oxford-street, and Rose-street, Soho, begs to particularize the "Tiles," [illegible] feet long by [illegible] feet wide, prepared expressly of "Galvanized Tinned Iron" for the covering of timber roofs of the ordinary construction. They will be found to form a durable perfectly weather-tight covering, as neither rain nor snow can possibly be driven under the laps by the wind, and the [illegible] accidents of "broken slates," with the annual rent-charge for such repairs are avoided. A square of covering of 24 gauge metal weighs about 1½ cwt., while slating weighs from 7 to 12 cwt.; the first cost of covering a roof with this metal on account of the great saving in wood-work is at least 15 per cent. less than a slated roof. A. W. begs to recommend the adoption of this metal for PANELS to DOORS, SHUTTERS, &c., as ordinary framed joinery work, as independent of the security against burglars, knots, [illegible], and many other disadvantages of wood panels are avoided. For all uses of this metal and information as to its applicability to any purpose, all parties are referred to the Surveyor of the Patentees, Mr. GEORGE MORGAN, No. 22, Parliament-street.
